Do you think that companies, like Flock, should collect private data to rent to law enforcement or sell to third parties?

☐ Yes

☒ No

If so, what kind of privacy and cyber security protections or audits should these entities be subject to?

I do NOT believe companies like Flock should be able to collect any data. However, since they are already doing it, I believe legislation needs to be passed to enforce transparency around HOW they are collecting it, WHAT they are collecting, and WHO gets access to that data.

Should States and local governments have the power to regulate AI use or data center infrastructure?

☒ Yes

☐ No

Do you think legal efforts are needed to offset the water and energy needs for the surge of data centers to protect local and state populations?

☒ Yes

☐ No

What sets you apart from the other candidates running in your party?

Tennessee faces problems from aging infrastructure. What are 3 things you intend to do to address these issues

1. Pass pot for potholes - utilize taxes from the legalization of marijuana to repair roads.
 2. Increase public transit access across the state - exploring larger scale options (like trains).
 3. Reorganize the budget to not prioritize corporate interests and put more funding into our infrastructure backlog.
-

Tennessee also faces new developmental challenges with respect to Data Center integration and energy demand and environmental impact on our beautiful state. What are 3 things you intend to do to address these issues

1. Enforce clean air and water standards - require any data center to maintain consistent clean air and water ratings.
2. Require all data centers to build and operate their own water reuse facilities.
3. In regards to energy use, I will pass legislation that ensures local residents are not being forced to pay for data center energy use - they'll pay for what they use.
